Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	The project focuses on analyzing food-ordering behaviour and consumer trends using a structured food-ordering dataset. The objective is to identify customer preferences, cuisine trends, spending patterns, restaurant-type preferences, delivery behaviour, discount usage, ratings, and repeat-order behaviour using Tableau.
Data Collection Plan	The required data will be collected from the provided Food Ordering Behaviour dataset in CSV format . The dataset contains customer and order-related attributes required for analysis. The data will be imported into Tableau, checked for quality, prepared for analysis, and used to create visualizations and interactive dashboards
Raw Data Sources	Primary raw source: Food Ordering Behaviour Dataset (CSV file) provided for the project. It contains approximately 50,000 food-

Identified	order records and 19 attributes , including City, Cuisine, Meal Type, Restaurant Type, Order Value, Delivery Fee, Rating Given, Discount Applied, Repeat Order, Mood, Hunger Level, Company, and Weather.
