

Business Question and Visualization Report

Date	27 August 2026
Team ID	-
Project Name	Food Ordering Behaviour and Consumer Trends
Maximum Marks	5 Marks

Visualization development refers to the process of creating graphical representations of data to facilitate understanding, analysis, and decision-making. The goal is to transform complex datasets into visual formats that are easy to interpret, enabling users to gain insights and make informed decisions. Visualization development involves selecting appropriate visual elements, designing layouts, and using interactive features to enhance the user experience. This process is commonly associated with data visualization tools and platforms, and it plays a crucial role in business intelligence, analytics, and reporting.

Business Questions and Visualisation

The process involves defining specific business questions to guide the creation of meaningful and actionable visualizations in Tableau. Well-framed questions help in identifying key metrics, selecting relevant data, and building visualisation that provide insights.

Sample

1. What are the different food preferences across cities?

- *Visualization:* Heat map showing the distribution of cuisines across different cities.
- *Screenshot of visualisation :*

2. How are orders distributed across different age groups and restaurant segments?

Visualization: Bar chart comparing revenue by product

- *Screenshot of visualisation :*

3. What is the distribution of customer preferences across different cuisines?

- *Visualization:* Map visualization showing customer satisfaction by region.
- *Screenshot of visualisation :*

4. How do orders vary across different companies and meal types?

- *Visualization:* Grouped bar chart comparing order counts across Company and Meal Type.

- *Screenshot of visualisation:*

5. How do customer ratings vary across different meal types?

- *Visualization:* Pie chart showing customer rating distribution by Meal Type.
- *Screenshot of visualisation:*

6. Which cities generate the highest number of food orders?

- *Visualization:* Bar chart ranking cities according to their total order volume.
- *Screenshot of visualisation:*

7. Which restaurant type has the highest average order value?

- *Visualization:* Horizontal bar chart comparing the average Order Value across different Restaurant Types.
- *Screenshot of visualisation:*

8. Is there a relationship between discounts and repeat orders?

- *Visualization:* Stacked bar chart comparing Discount Applied with Is Repeat Order.
- *Screenshot of visualisation:*

Note: Min 8 business question and visualisations Required inform of above
